DETAILED ACTION

Claim Rejections - 35 USC §101

1. Claims 1-19 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, claims 1, 2 and 4 only recite an abstract idea. The recited steps of merely maintaining an optimal level of inventory and performing analysis to determine optimum level does not apply, involve, use, or advance the technological arts since all of the recited steps can be performed in the mind of the user or by use of a pencil and paper. These steps only constitute an idea of how to determine a method of replenishment.

Additionally, for a claimed invention to be statutory, the claimed invention must produce a useful, concrete, and tangible result. In the present case, the claimed

Application/Control Number: 09/996,832

Art Unit: 3627

invention senses the level of (product) inventory (i.e., repeatable) used in determining if inventory is at optimum level and replenishes the (product) inventory (i.e., useful and tangible).

Although the recited process produces a useful, concrete, and tangible result, since the claimed invention, as a whole, is not within the technological arts as explained above, claims 1-19 are deemed to be directed to non-statutory subject matter.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Brinkley et al. (5,963,919). As best understood, Brinkley a method for maintaining an optimal level of inventory comprising the following steps: determining an optimum level of at least one product in inventory (via generating optimal inventory level 208) of inventory residing at a plurality of locations (via various cabinets 110), sensing the inventory level of at least one product in inventory at the plurality of locations to determine if the inventory level of the product is less than the optimum level at either location (using a par-leveler 400), if it is determined in step c that the inventory level of the product is less than the optimum level at one of the plurality of locations, then determining a method to replenish the inventory(col. 6, lines 17-24), and if it is determined in step c that the level

Art Unit: 3627

of inventory is greater than or equal to the optimum level, then repeating step c and subsequent steps (via par-leveler 400; col. 8, lines 45-50).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yabe et al., Brinkley et al., Ettl et al., Yang et al., Weber et al., Waller et al., Hill et al., Wagner et al. are cited for disclosing managing inventory level and replenish when the level is depleted.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynda Jasmin whose telephone number is (703) 305-0465. The examiner can normally be reached on Monday- Friday (8:00-5:30) alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert P Olszewski can be reached on (703) 308-5183. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
